Summary

AI Engineer specializing in NLP, with experience in text classification, sentiment analysis, and Transformer architectures. Currently applying AI to mobile systems as AI Engr Intern at CloudGate Technologies. ML certified; BS Computer Science, NUTECH. Seeking AI/NLP Engineering roles.

Technical Skills

Languages: Python, SQL

Technologies: PyTorch, NumPy, Scikit-learn, Matplotlib, Pandas, NLTK, spaCy, Google Colab, Kaggle, Transfer Learning, Feature Extraction, Semantic Search, On-Device Inference

Experience

HashDev Solutions - Building the Future of Technology.

current

AI Automation Engineer

- Deploying scalable AI-driven workflows to streamline business processes. Expert in leveraging advanced LLMs and integration frameworks to enhance operational efficiency and system automation.

Cloud Gate Technologies - Building smart and AI solutions.

Mar 2026 – July 2026

AI Systems Engineer

- Evaluated and benchmarked 10's models for mobile inference, integrating the optimal solution into a production mobile application feature, improving efficiency under real-world hardware constraints.

OptiExperts - Shopify Plus Agency in UK.

Oct 2024 – Jan 2025

Front End Developer

- Developed and optimized responsive Shopify e-commerce landing pages using HTML, CSS, and JS, achieving 10% improvement in overall store performance metrics through page speed and design enhancements.

Projects

Movie Reviews Sentiment Analysis | Python, NLTK, Scikit-learn, Hugging Face, IMDB Dataset

- Developed a sentiment analysis pipeline on the IMDB movie reviews dataset to classify user reviews as positive or negative. Applied text preprocessing techniques including tokenization, stopwords removal, and vectorization.

VTON-webshop | React.js, MongoDB, Express.js, Node.js, Python

- Led the AI development of a VTON, integrating the CATVTON model into a MERN e-commerce store to enable real-time clothing visualization.

Semantic Image Clustering & Labeling System | Kotlin, MobileCLIP-S2, ONNX Runtime, NNAPI

- Optimized on-device visual inference and semantic labeling by deploying a high-performance MobileCLIP-S2 model via NNAPI, enabling automated thematic album creation with 95% accuracy on local hardware.

Education

National University of Technology

June 2025

Bachelor of Science in Computer Science.

Islamabad, Pakistan

- Relevant Coursework:** Database Systems, Artificial Intelligence, NLP, ML.

Certifications

Professional ML Engineer | Google Certification by NVTTI

NVTTI-D2F49404DC

ML Specialty | AWS Certification by NVTTI

NVTTI-0391B63F91
